Available in Aluminium and Stainless Steel frame

MODU System Continuous Flow Elevator / Lowerator is commonly used to convey food and beverage cases, bagged products, trays, and other similar items. It is designed for high speed and large payload capacity. Continuous Flow Elevators / Lowerator frees up floor space in case/carton palletizing lines, warehousing, or in work-in-progress storage applications by transferring products to an overhead conveyor section. This machine is ideal to create aiseways, clearance for forklifts, transfer product between floors and etc.
